Senior Full Stack Engineer with 8 years of experience building web products end to end with TypeScript, JavaScript, React.js, Next.js, Node.js, Express.js, PostgreSQL and MongoDB. Has delivered subscription checkout and paywall flows, campaign tooling, an enterprise SaaS design extension, offline-first healthcare apps and AI testing tools. Re-architected a monolith into microservices, added Redis caching, and owns work from API design through UI, deployment and production support. Mentors engineers and owns code review.

SKILLS

Languages	TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS
Frontend	React.js, Next.js, Redux, Redux Toolkit, Zustand, TanStack Query, Material UI, Tailwind CSS, Storybook
Backend	Node.js, Express.js
Databases	PostgreSQL, MongoDB, Redis
Architecture	System Design, API Design
Testing & Analytics	Jest, React Testing Library, Snowplow Analytics
Cloud & Tools	AWS (EC2, S3, SQS, SNS), Git, Jira, Agile / Scrum

EXPERIENCE

2024

Present

Senior Software Engineer — TAO Digital India Pvt. Ltd.

Bengaluru, India · Mar 2024 – Present

Client: Condé Nast — Subscriptions & Consumer Revenue

- Onboarded Tatler end to end across checkout, email and funnel services (theming, OIDC sign-in, EU-market funnel routing), and launched the campaign platform on Glamour Mexico.
- Built brand-agnostic checkout components serving 15+ Condé Nast brands (exit-intent popup, countdown timer, one-click payment redesign) with Storybook stories and tests.
- Built paywall UI on the multi-brand React SSR platform: a configurable paywall banner used across brands, an inline paywall for live-news pages, and secure cross-frame resizing using origin-checked postMessage.
- Top contributor to the campaign-management GraphQL API: paginated campaign queries with tests, a fix for expired-campaign handling, and versioned campaign-unit descriptions.
- Delivered passwordless magic-link sign-in for existing subscribers across the TypeScript checkout service and Next.js UI.
- Instrumented Snowplow analytics across gift, redeem and checkout flows, capturing product, transaction and consent data.
- Rebuilt source tracking in the campaign admin app with JSON-schema forms, URL validation and developer-only editing.
- Enabled cross-market offers (Vanity Fair in GB), shipped UK legal and tax-copy updates, and made subscription values config-driven.
- Patched CVEs across 5 Node.js services and added Helm rollback workflows to 5 microservices.

Internal Product: ZETA — Agentic AI Testing Platform

- Built the React frontend of ZETA, TAO's agentic AI testing platform that turns application sources and requirements into test cases and executable test scripts, authoring 55 files across its core generation workflows in 2 weeks.
- Designed the async job experience: a live progress tracker for long-running AI generation, idempotency keys to block duplicate submissions, and de-duplicated API calls.
- Delivered a Figma-driven UI revamp and optimised the design-editing screen.

Tech: Next.js, React.js, TypeScript, JavaScript, Node.js, Express.js, GraphQL, SCSS, Storybook, Jest, Snowplow, AWS, Material UI

2022

2024

Full Stack Developer — Napses Technologies Pvt. Ltd.

Bengaluru, India · May 2022 – Mar 2024

- Built the backend of BugSmasher, an internal bug-reporting tool that stores screen recordings in AWS S3 and auto-creates tasks in Jira or Notion.
- Optimised booking and scheduling flows in the backend of a car-service platform.
- Owned features end to end, from API design and UI to deployment and stakeholder demos.

Tech: React.js, Next.js, TypeScript, Node.js, Express.js, PostgreSQL, AWS (S3), Tailwind CSS

2020

2022

Full Stack Developer — Naraci Technologies Pvt. Ltd.

Bengaluru, India · Aug 2020 – May 2022

- Re-architected the monolithic Node.js server of an enterprise SaaS SketchUp extension for interior designers into microservices split by business domain.
- Proposed and delivered a redesign of the in-SketchUp React UI, replacing a full-screen three-bar layout with a single mobile-style sidebar that keeps the design canvas clear.
- Built component-library management for static parts (handles) and parametric parts (drawers, tandem boxes) whose dimensions, textures and laminates live in MongoDB and are served via Node.js for placement in SketchUp.
- Made frequently used components load faster by caching favourites in Redis, since building parametric components on demand was slow.
- Built render management: captured camera angle, component visibility, lighting and luminosity, handed jobs to the rendering engine via MongoDB, and returned photorealistic renders to the UI.
- Built user management; mentored 3 engineers and owned pull request reviews.

Tech: React.js, Node.js, Express.js, MongoDB, Redis, AWS (EC2, S3), JavaScript

2019

2020

Junior Software Engineer — UPapp Factory

Bengaluru, India · Jul 2019 – Aug 2020

- Built the Node.js backend for UPapp Factory's catalog platform, where clients pick prebuilt apps and websites, customise them and launch in 21 days, or commission custom builds.
- With no senior engineer on the team, owned development, AWS EC2 deployment and server maintenance end to end, self-learning each.
- Expanded into React UI and delivered React Native apps for 3+ client projects, including TuitionMela (tutor discovery) and a Dubai event platform for Comex (event listings and shop maps).
- Mentored incoming React Native developers as the team grew.

Tech: MongoDB, Express.js, React.js, Node.js, React Native, AWS (EC2, S3), JavaScript

2018

2019

Software Engineer — Teslon Technologies Pvt. Ltd.

Bengaluru, India · Aug 2018 – Mar 2019

- Rebuilt the UI of an offline-first patient data-collection and appointment app from AngularJS in Vue.js, packaged as an Android APK with Cordova; data was stored on-device in CouchDB and synced to the cloud when connectivity returned.
- Deployed the company's remote-healthcare kit at 5 sites (Agartala, Dhubri, Guwahati, Kolkata, Jindal) linked to the Narayana Hrudayalaya hospital network, and trained doctors, nurses and support staff.
- Shipped features and bug fixes on the Node.js and MongoDB backend.

Tech: Node.js, MongoDB, JavaScript, Vue.js, AngularJS, Cordova, CouchDB

EDUCATION

2017**Bachelor of Engineering**

Dayananda Sagar Academy of Technology & Management, Bengaluru
